

MOLINA HEALTHCARE OF NEW JERSEY

Clinical Policy: Semaglutide (Ozempic) for Type 2 Diabetes Mellitus

Policy Number: NJ-RX-SEMA-DM-2024 | Effective: 2024-01-01 | Version: 1.2

1. SCOPE

This policy applies to Molina Healthcare of New Jersey Medicaid managed care members seeking prior authorization for semaglutide (Ozempic, Rybelsus) when prescribed for the management of type 2 diabetes mellitus.

Applicable HCPCS codes: J3490 (Unclassified drugs — semaglutide injectable).

Applicable NDC codes: 0169-4132, 0169-4178, 0169-4181 (Ozempic).

Applicable ICD-10: E11.9 (Type 2 diabetes mellitus without complications); E11.65 (with hyperglycemia); E11.40 (with diabetic neuropathy).

Lines of business: Medicaid managed care. States: NJ.

2. COVERAGE POLICY — MEDICAL NECESSITY CRITERIA

Authorization is approved when ALL of the following criteria are met:

2.1 DIAGNOSIS

Confirmed diagnosis of type 2 diabetes mellitus documented in the medical record.

2.2 AGE

Patient is 18 years of age or older.

2.3 GLYCEMIC EVIDENCE

Hemoglobin A1c value of 7.0 percent or greater documented within the prior 90 days.

2.4 STEP THERAPY (ALL OF THE FOLLOWING)

- (a) Documented trial of metformin for a minimum of 3 months, unless contraindicated.
- (b) Inadequate glycemic response to metformin monotherapy at maximum tolerated dose.

2.5 PRESCRIBING INDICATION

The medication is being prescribed for the management of type 2 diabetes mellitus, not for weight management as a primary indication.

3. EXCLUSIONS

This policy does not cover semaglutide when:

3.1 PRIMARY INDICATION IS WEIGHT LOSS

The medication is being prescribed primarily for weight management or obesity rather than for glycemic control. Such requests should be evaluated under the separate anti-obesity medication policy.

3.2 TYPE 1 DIABETES

Patient has a diagnosis of type 1 diabetes mellitus (E10.*).

3.3 PERSONAL OR FAMILY HISTORY

Personal or family history of medullary thyroid carcinoma or Multiple Endocrine Neoplasia syndrome type 2 (contraindication).
